

The NASA Challenge

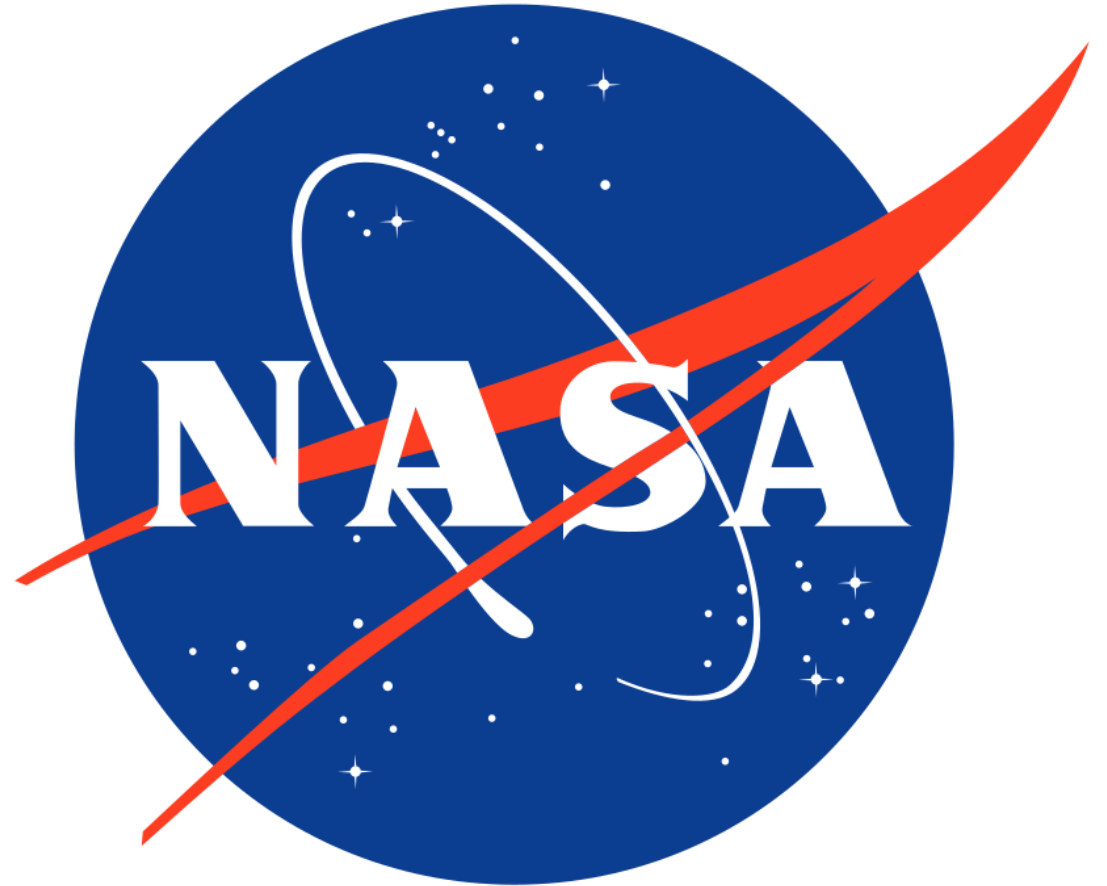

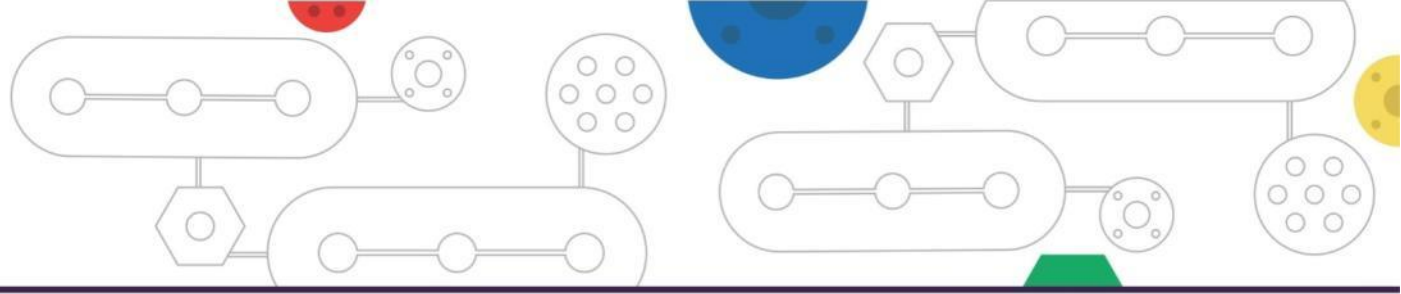

How Will You Survive on the Moon?

You are a team of astronauts, stranded on the moon after your lander crashed some distance from the lunar base.

You have a selection of items in your lander. Before setting off, you must rank their importance for survival: first individually, then as a team.

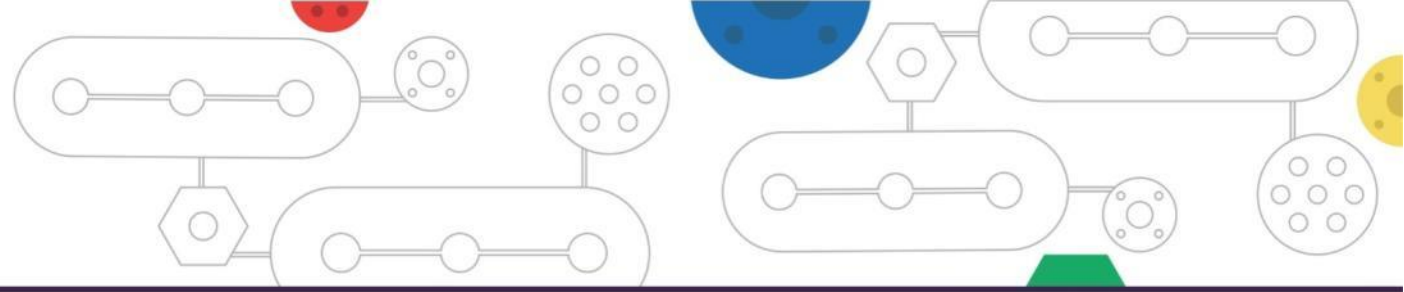

- Your team **must** arrive at consensus **before** submitting their rankings.
- Each team's results will be compared with a 'correct' answer, as provided by Mr. Radnofsky: Chief of the Crew Equipment Research Department of NASA's Manned Spacecraft Center.

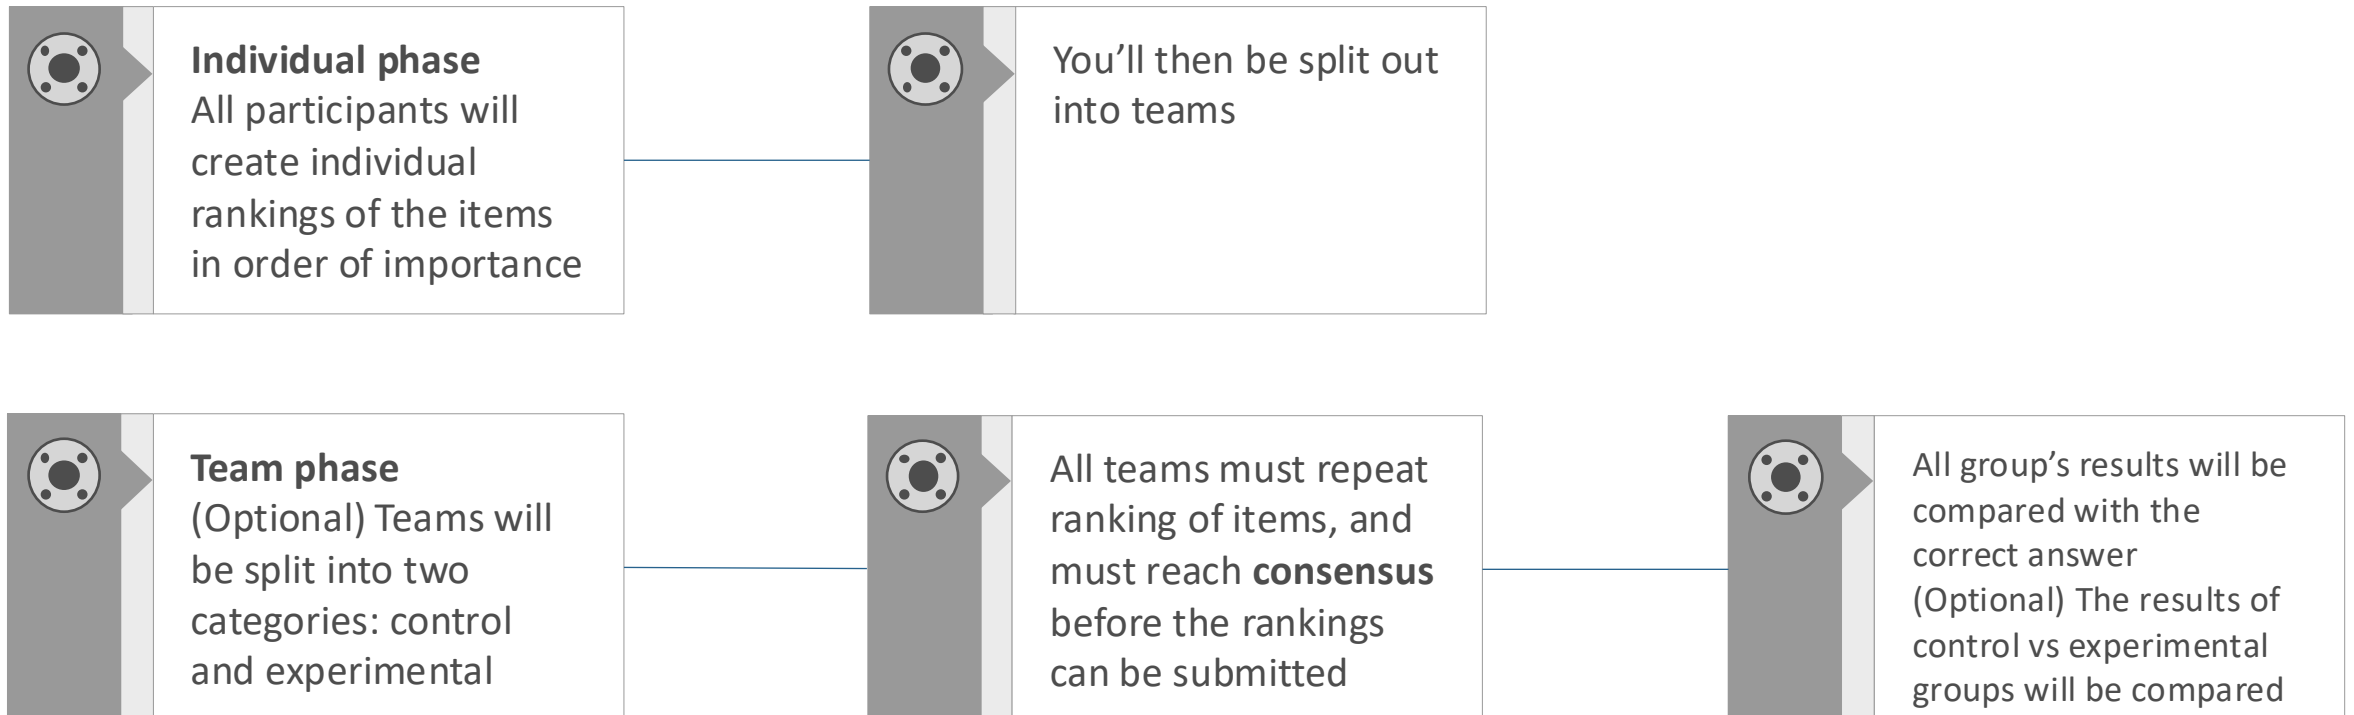

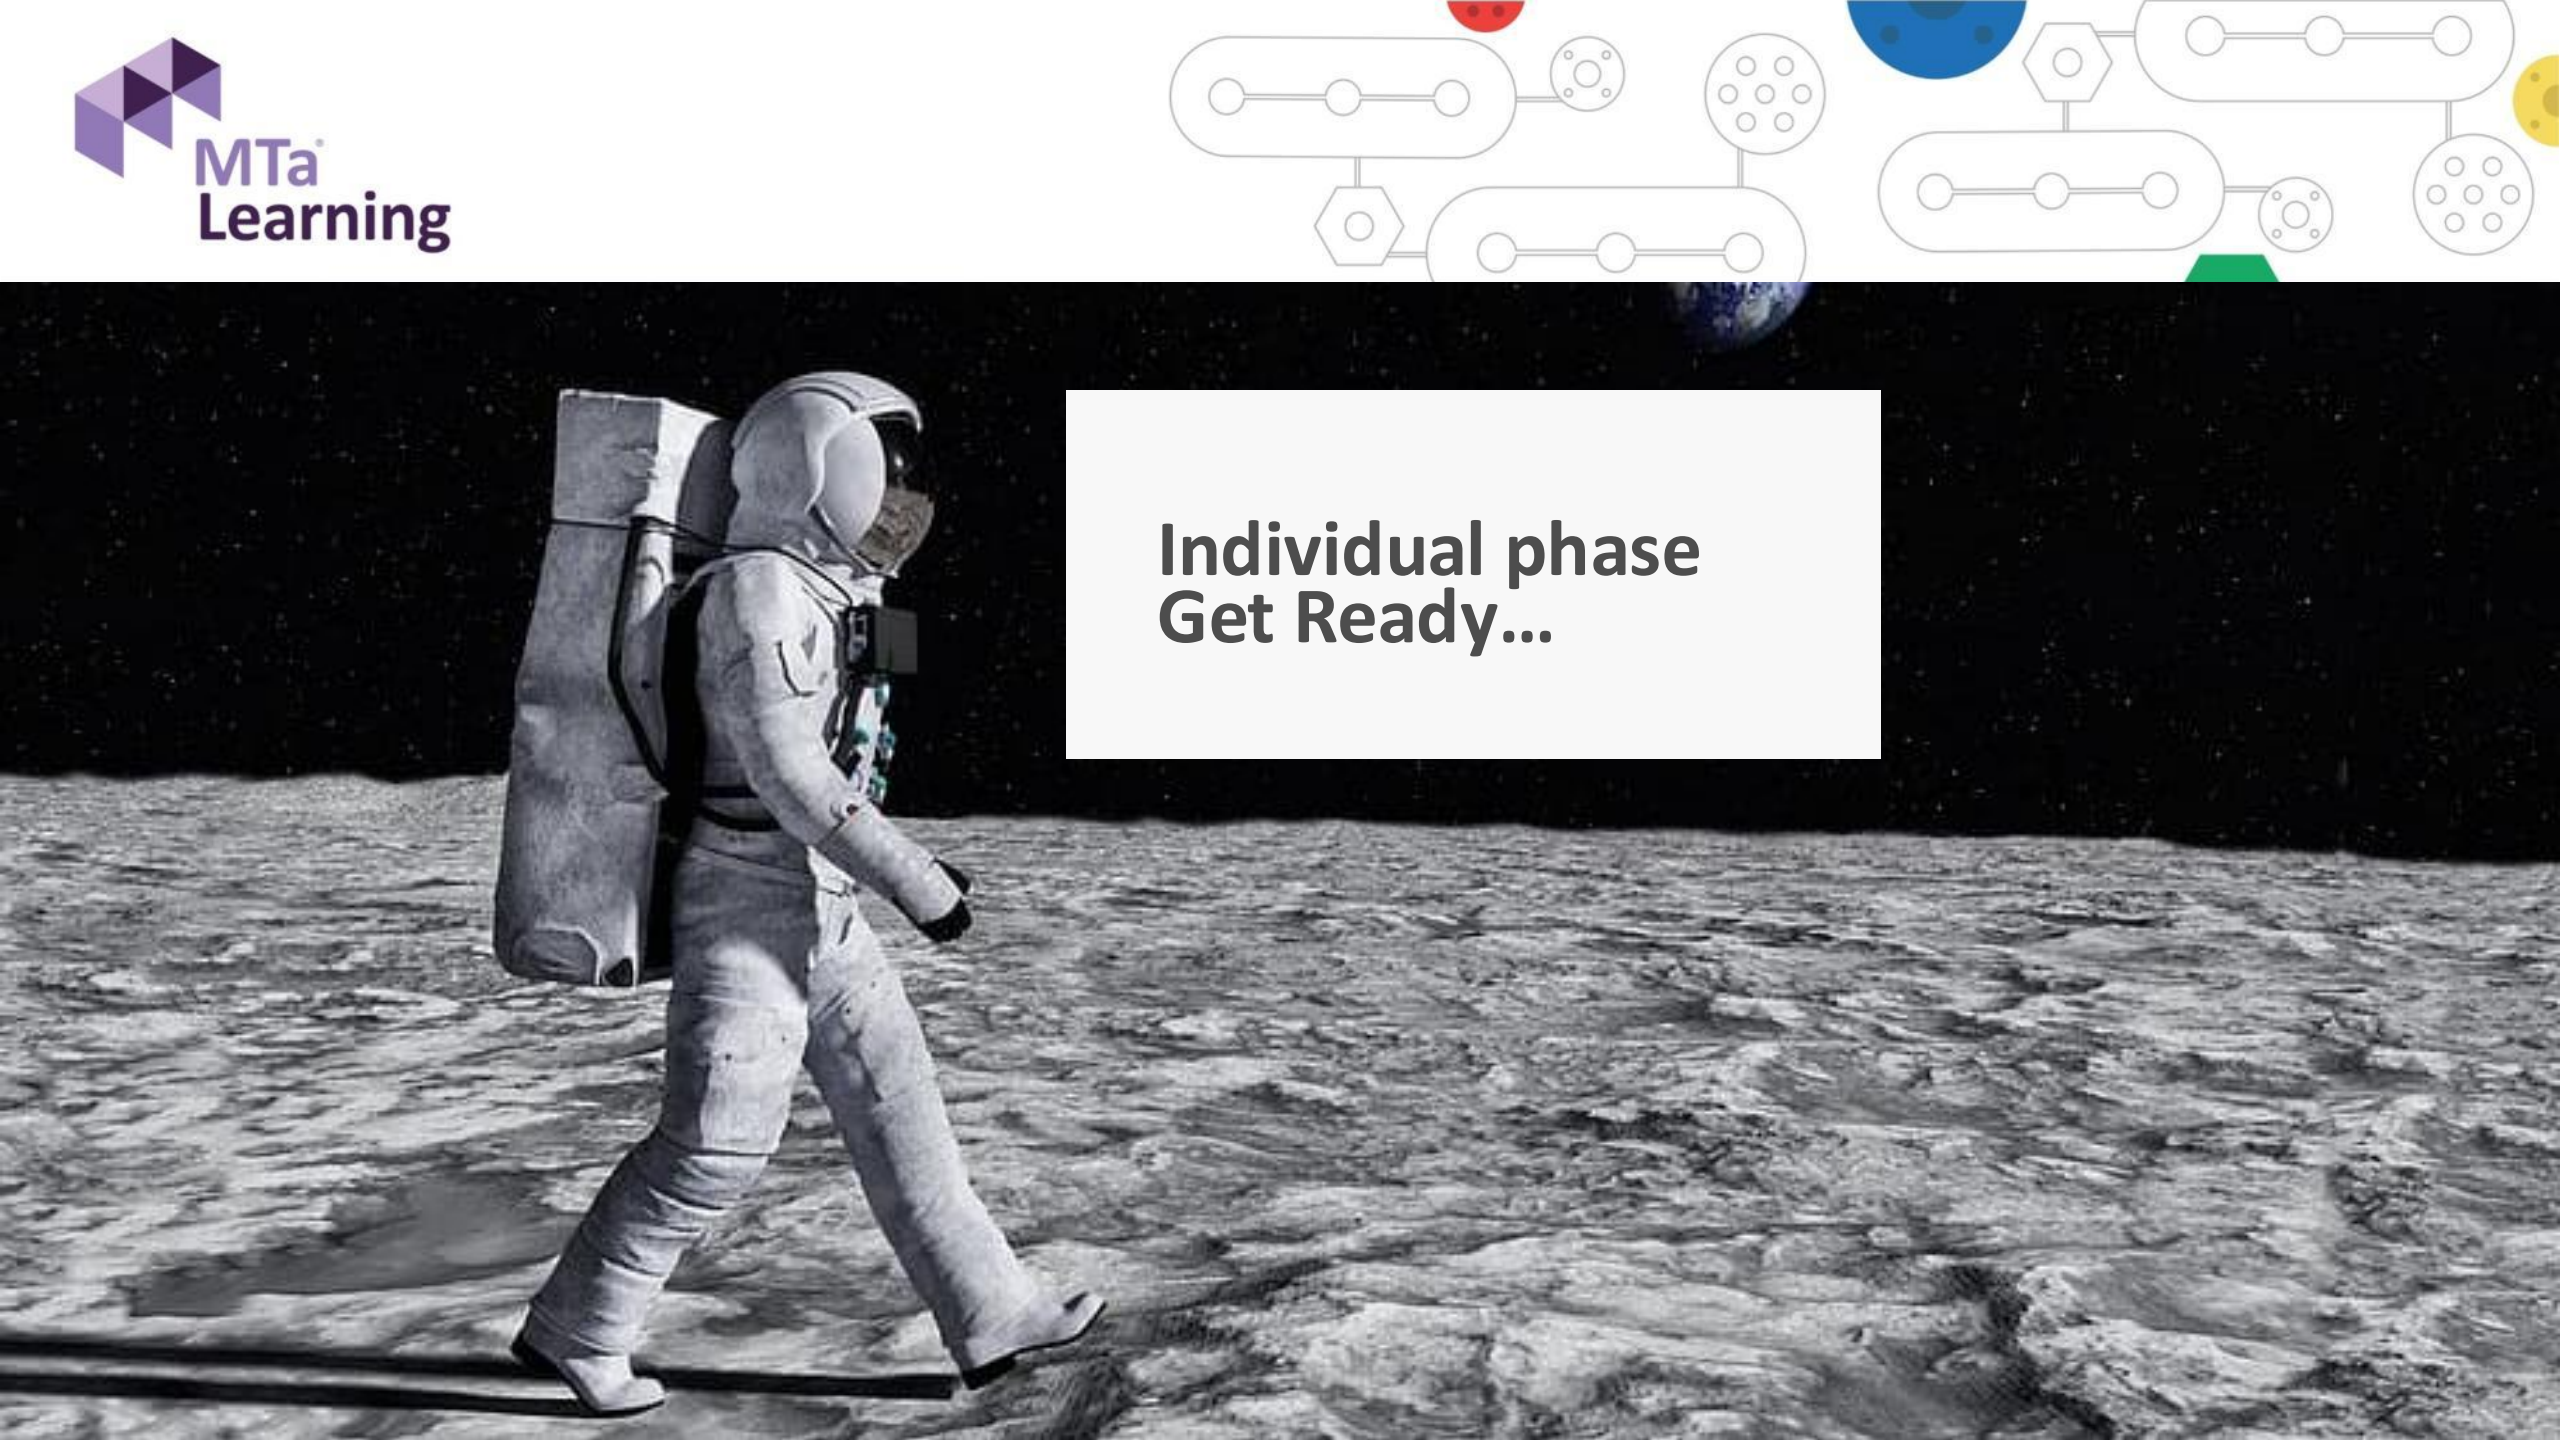

The Available Items

Box of matches
Food concentrate
50 feet of nylon rope
Parachute silk
Portable heating unit
Two .45 calibre pistols
One case of dehydrated milk
Two 11 lb. tanks of oxygen
Stellar map
Self-inflating life raft
Magnetic compass
20 litres of water
Signal flares
First aid kit, including injection needle
Solar-powered FM radio transmitter

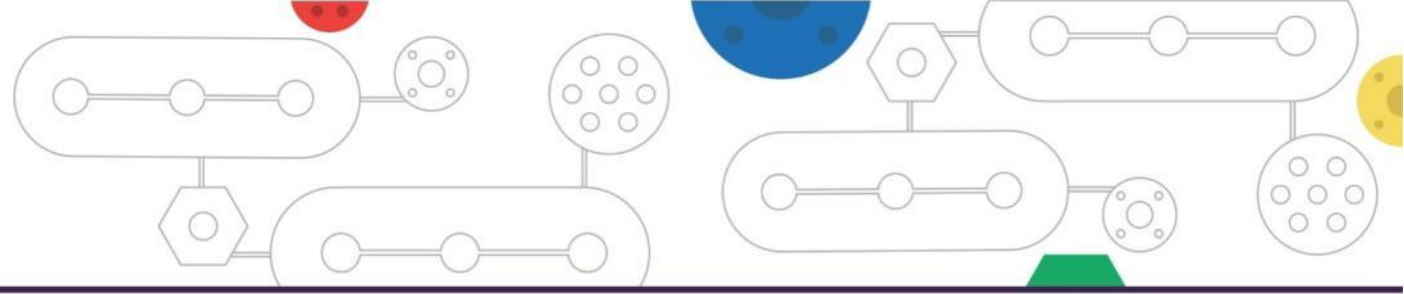

How the Activity Works:

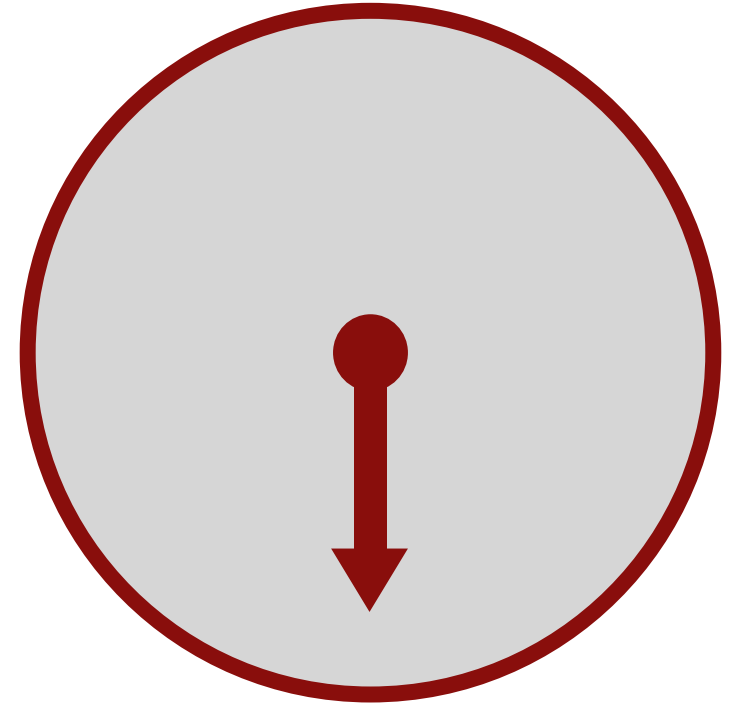

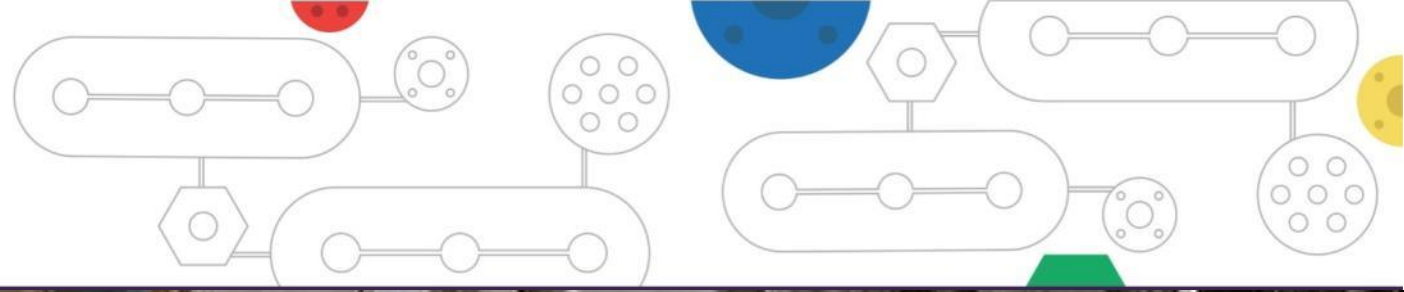

Individual phase
Get Ready...

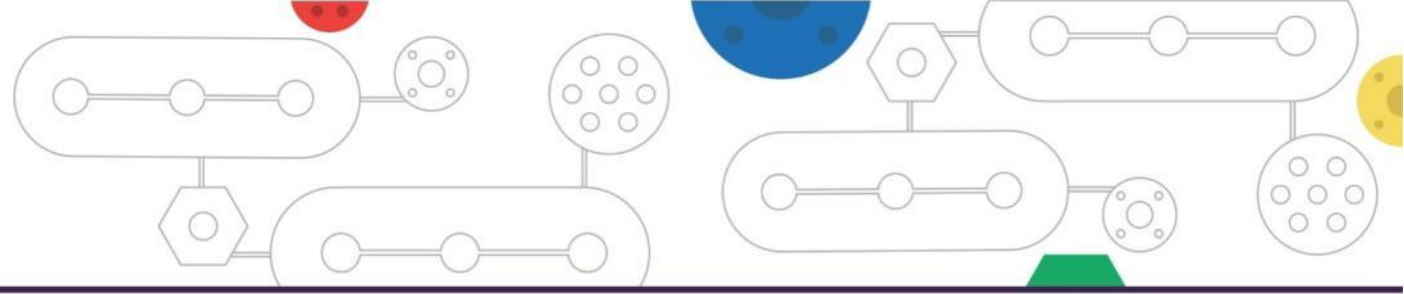

STOP!

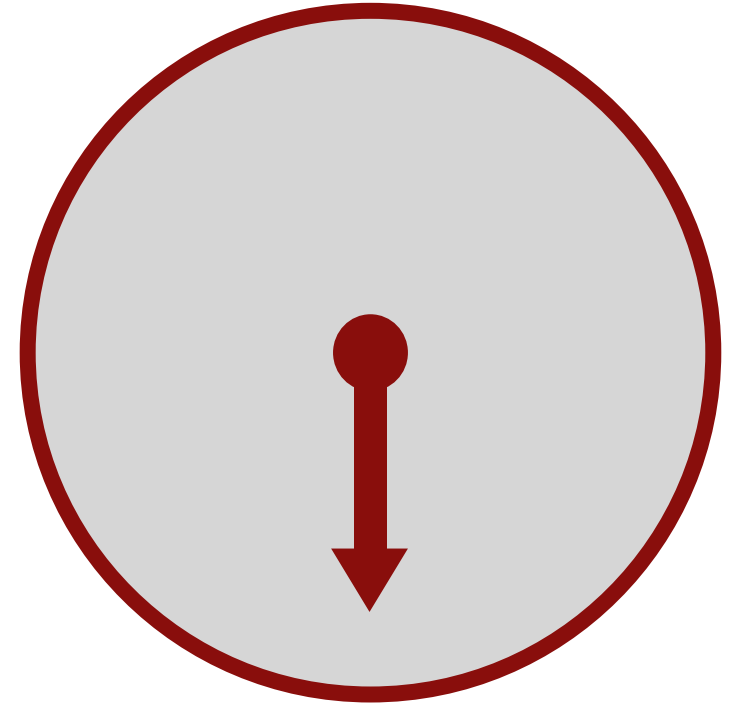

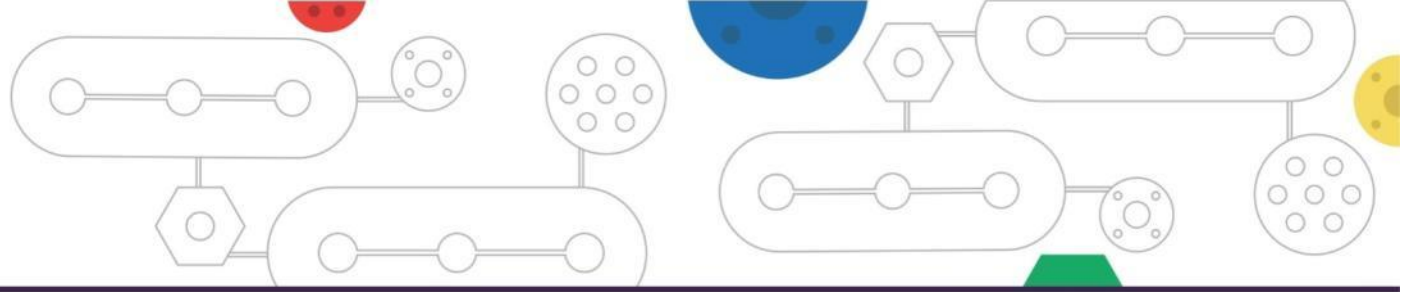

**Team phase
Get Ready...**

STOP!

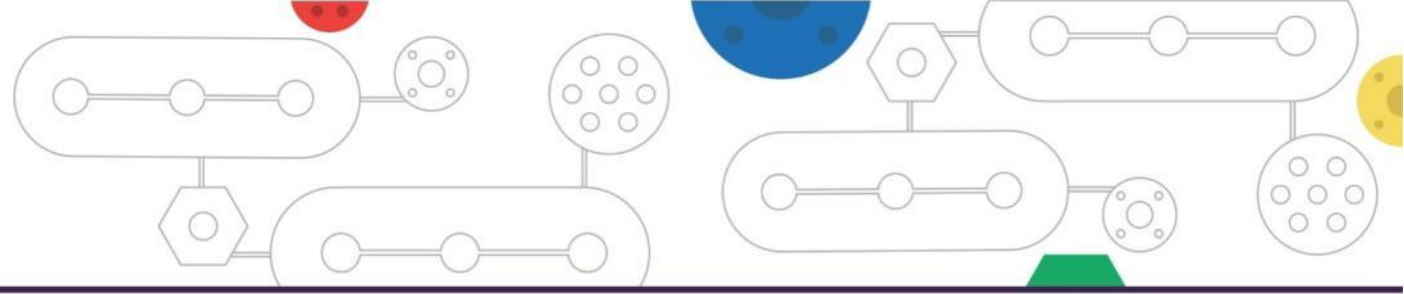

The Available Items

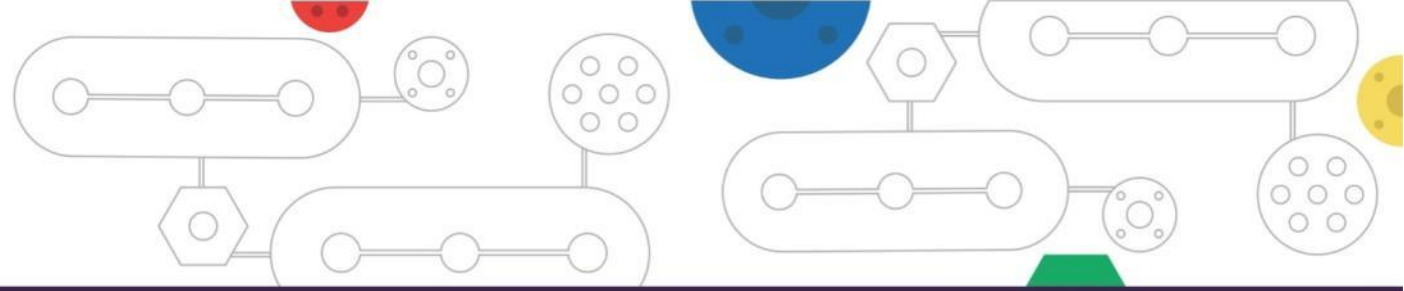

Box of matches
Food concentrate
50 feet of nylon rope
Parachute silk
Portable heating unit
Two .45 calibre pistols
One case of dehydrated milk
Two 11 lb. tanks of oxygen
Stellar map
Self-inflating life raft
Magnetic compass
20 litres of water
Signal flares
First aid kit, including injection needle
Solar-powered FM receiver-transmitter

The Correct Order

1. Two 11 lb. tanks of oxygen
2. 20 litres of water
3. Stellar map
4. Food concentrate
5. Solar-powered FM receiver-transmitter
6. 50 feet of nylon rope
7. First aid kit, including injection needle
8. Parachute silk
9. Self-inflating life raft
10. Signal flares
11. Two .45 calibre pistols
12. One case of dehydrated milk
13. Portable heating unit
14. Magnetic compass
15. Box of matches

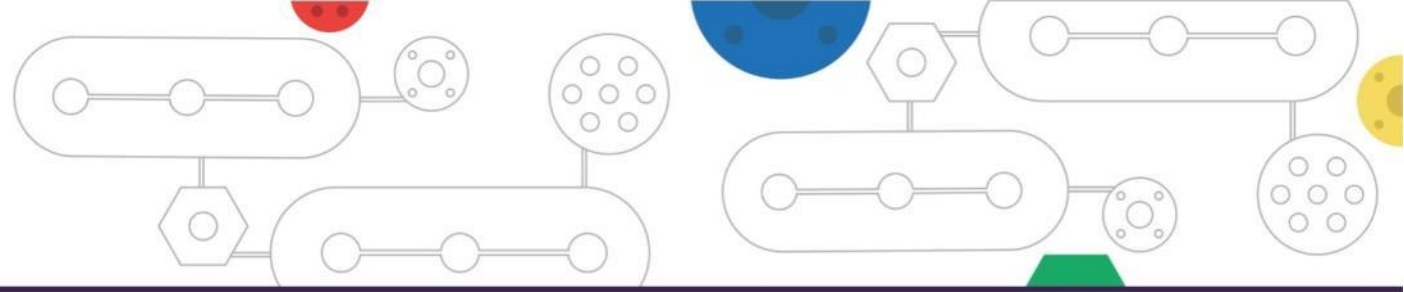

But why?

Rank	Item	Rationale
1	2 hundred-pound tanks of oxygen	Absolute necessity for life support
2	5 gallons of water	Absolute necessity to sustain life
3	Stellar map (of the moon's constellation)	Most important means of determining position and directions
4	Food concentrate	Satisfies basic energy requirements
5	Solar powered FM receiver-transmitter	Only useful if line-of-sight transmission is possible with limited transmission range
6	50 feet of nylon rope	Useful for scaling cliffs, tying injured together, etc.
7	First aid kit containing injection needles	Injection needles fitted to suit aperture quite useful
8	Parachute silk	Protections from the sun's rays
9	Life raft	CO2 bottle possible propulsion device
10	Signal flares	Possible distress signal once close enough to mother ship to be seen
11	Two .45 calibre pistols	Possible source of self-propulsion
12	1 case dehydrated Pet milk	Duplicates food concentrate in bulkier form
13	Portable heating unit	Only useful if on the dark side of the moon
14	Magnetic compass	Virtually useless since magnetic field on the moon isn't polarized
15	Box of matches	Useless since there is no oxygen on the moon

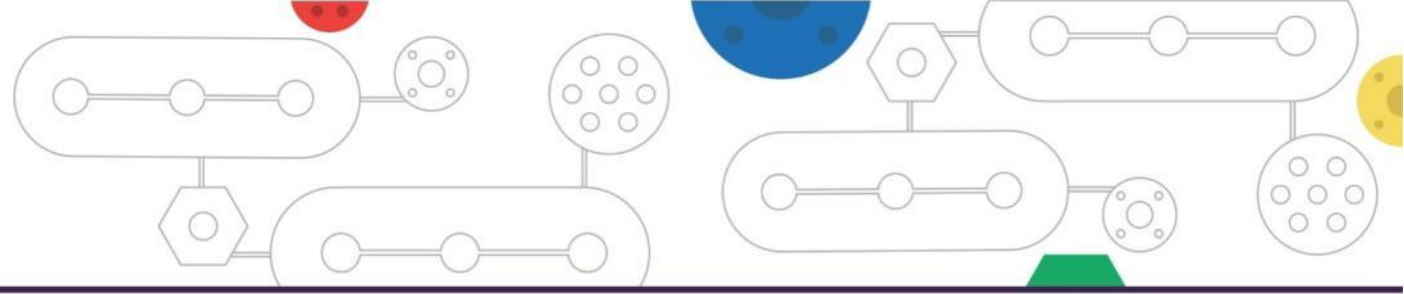

Now forget the rankings. How did you really do?

Individually complete the review sheet. Be honest! There are no right answers.

Review questions:

1. How did the team make decisions during the activity?
2. What actions did your team members take to gain consensus on the ranking?
3. What did you do to help build consensus on the ranking?
4. What was the impact of your actions on team performance?
5. What have you learnt about your colleagues through taking part in this activity?
6. What have you learnt about yourself through taking part in this activity?
7. What can you take from this activity to enhance the way that you and your colleagues work

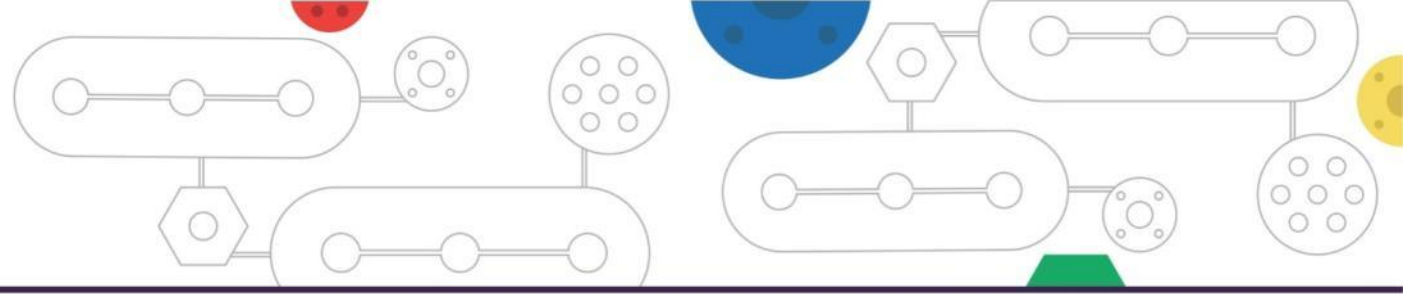

The most important bit...

What are the key learning points you can take away from this activity?

How can you apply this learning to improve your team and individual performance?

Need to deliver a high impact workshop urgently?

We ship professionally designed activities next day and can deliver to anywhere in the world. Our facilitators are always on hand to provide free support, enabling you to get started quickly and perform to your best.

Order Now

Or call us now on + 44 (0) 1937 844800 or US +1 202 888 2776 and we'll help you find the activity you need.
